

Walla Walla Public Schools

BOARD POLICY

Policy No. 4060

Page 1 of 1

DISTRIBUTION OF INFORMATION

The board recognizes that valuable social, recreational and educational opportunities are available to families and students through local nonprofit organizations, governmental entities or district recognized community partners providing services for students. The district may choose to make information available to students and families about these programs, provided that doing so does not interfere with the educational process.

Local nonprofit organizations, governmental entities or district recognized community partners may submit information about activities for students for possible distribution through the district's electronic flyer distribution platform. Any information distributed must meet certain standards and be approved by district staff according to the procedures accompanying this policy.
